

## Fact #7

## Choose from 31 beautiful colors

Fraster's felt products are produced to order. This means that you can freely choose from the entire palette of 31 colors. You can also freely combine felt carpets, Twister, COVERdouble and other products with two or more colors.

### Strong color fastness

The wool felt used at Fraster is piece-dyed after felting at the factory in Germany. The dyeing process takes 8 hours, and throughout the process the water temperature and pH value are adjusted to ensure a perfect result with the best attainable color fastness.

The color fastness will vary from color to color (as is the case for all textiles) and is lowest for bright and yellow colors.

### Natural colors

Some colors in the palette are natural wool colors, i.e. from sheep fleece.

### Environment

Our wool felt is colored in Germany and is subject to EU regulations on dyes and water discharge, excess dye, etc.

### Receive a color sample

You are always welcome to order felt samples from Fraster. In addition to our box with felt dots in all 31 available colors, or A4 samplecards with all colors, we are happy to deliver larger samples of selected colors for customer presentations and the like.

Contact us by telephone: +45 8788 2244  
or send an email to [post@fraster.dk](mailto:post@fraster.dk).

**250 Truffle**

In order to achieve the desired rustic impression in this color variety, another wool blend is used than with the other colors. The wool also contains vegetable residues, which are visible in the final fabric and helps to provide it with the right expression.
