

Danish Produced Handicraft

All of Fraster's products are manufactured in our own mill just outside of Silkeborg. And while we deliver to projects in Scandinavia, the Netherlands, Belgium and the United States, we still maintain good craftsmanship traditions.

As a contract manufacturer felt mill, we have no finished goods inventory. Instead, we begin each project by bringing out the felt roll in the correct color and thickness and cutting it on our digital cutting table - with a knife (instead of laser) to ensure the best possible edge, even for the finest patterns.

We also have modern machines for sewing. Meanwhile, the rest is solid needlework; performed by experienced staff with attention to detail and a willingness to deliver perfect results. Every time.

From file to felt

You can deliver your finished design as .ai or .dmg files (alternatively as pdf). And if you need advice or answers regarding product technical queries or otherwise, you are always welcome to contact us by tel. +45 8788 2244. You can also write to us at post@fraster.dk

Need a sample?

We provide free samples at desired dimensions for our various felt types and colors. If you are working on a specific design, it is also possible to have a pattern sample custom cut.
