

# Careful handling of magnets

The enclosed magnets are very strong and must be handled with caution.

Before the magnets are separated from each other, please note how they must point towards each other by the mounting.

(The magnets can e.g. be marked with a pen on the two sides that must point towards each other)

If the magnets are adjoined without the provided plastic ring or a similar thick material, it can be difficult to separate them again.

The mounting of the magnets on the window must be performed by two persons.

Person 1 holds magnet 1 on the selected spot on the window, while person 2 puts magnet 2 on the window approximately 30 cm away from magnet 1. Subsequently, magnet 2 is carefully glided towards magnet 1 until they adjoin.
