

MELLANA 1300 / 1400

MELLCOMBI

Specification & Composition

woven
 Country of fabrication: Austria
 Pile Mellana: 100 % wool
 Pile Mellcombi: warp: approx. 50 % sisal
 approx. 50 % wool
 weft: 100 % sisal
 Backing fabric Mellana: polypropylene
 Backing fabric Mellcombi: sisal
 Backing Mellana 1400: environmentally friendly precoat
 Backing Mellana 1300: latex backing

Dimensions: (widths)

Mellana 1400: approx. 200 cm
 Mellana 1300: approx. 70, 90, 120 and 200 cm
 Mellcombi: approx. 70, 90, 120, 160 and 200 cm
 Roll lengths: approx. 25-30 lin.mtr.

Technical Details:

	Total weight	Total height
Mellana 1300	approx. 2.500 g/m ²	approx. 5,5 mm
Mellana 1400	approx. 2.500 g/m ²	approx. 10,5 mm
Mellcombi	approx. 1.900 g/m ²	approx. 5,5 mm

Application area:

Mellana 1300:

Mellana 1400:

Mellcombi:

Tested for harmful substances (Öko-Tex Standard 100)

Bindings:

overedged
 leather tape
 suede leather tape
 synthetic tape
 cotton tape (only for Mellcombi)

We reserve the right to introduce technical alterations, if they serve to improve the product.

Care and Cleaning

Your carpet will retain its beauty over a long period of time as long as the following rules are observed:

- Regular vacuum cleaning. Once weekly in high traffic areas more frequently
- Remove stains without delay. Immediate stain removal is the key to success.
 - Blot up liquid spills with plain absorbent paper towels. Remove semi-solid or solid substances with a blunt knife or spoon. Blot up stain with a moist sponge. Blot dry with plain paper towels or an absorbent white cloth.
 - For stain removal Mellau-Teppich recommends the cleaning set "Tapi-Maxi-Set" of Jeikner (www.jeikner.de).
- Professional cleaning in residential areas annually or bi-annually.

Thorough Cleaning for Mellana 1400 and Mellana 1300:

- Wet cleaning: First vacuum thoroughly. Rent a wet-cleaner machine and use an adapted cleaning product. Use the machine and carpet shampoo according to the manufacturer's instructions. Dilute the carpet with the machine as little as possible. Do not drench the carpet. Keep it as dry as possible. Distribute the product evenly. Pay particular attention to stained parts. Maximize the amount of water removed from the carpet by making a water-extraction pass with the water spray on and then again with the spray off. Test the carpet with your hand. If your hand comes away with water droplets, extract again with the spray off; if your hand comes away damp and the carpet feels wrung out, you have extracted correctly. Wait overnight for the carpet to dry before walking on it. To dry thoroughly, open windows.

Thorough Cleaning for Mellcombi:

Sisal carpets help to maintain a balanced indoor atmosphere, because they can absorb humidity and release it. If the fibres become excessively wet sisal shrinks. This must be borne in mind when cleaning, so never allow sisal carpeting to become soaked.

- Dry cleaning: The carpet is cleaned by sprinkling it with a powdered shampoo of a reputable proprietary brand. Follow the manufacturer's instructions.
 - Cleaning with "Tapi-Maxi-Set" from Jeikner: First vacuum thoroughly, then apply "Tapigold" carpet shampoo generously on a brush with long natural fibre bristles, not directly on the carpet. Then treat the carpet. "Tapigold" and remaining dirt will dry into a fine crystalline dust in two or three days, depending on the warmth and humidity of the room. This residue can be removed quickly with a vacuum cleaner.
-
