

# Modi

Modi is the furniture for calm places.

Modi is mobile and easily moved to places, where shielding for project groups, or a single concentrated working place is required.

Modi consists of a firm wooden core, mounted with acoustic plates on both sides and covered with a "felt coat".

A large colourpalette in felt gives a various number of possibilities to decorate Modi to match the rest of the interior.

The dimensions of Modi incl. wheels and handle are: height 158cm, width 95cm, depth 11cm.

The acoustic absorbing area: height 152cm, width 80cm, depth 8cm.

Modi is designed in collaboration with Acer Design A/S.
