

GlassCover

Almost floating in the air, noise-reducing and shielding.

GlassCover can be made to measure and is mounted directly on the glass with magnets. The maximum width is however 175 cm.

With a colour selection of 34 colours, the possibility to design your own carving pattern and size as required, a GlassCover can match any decoration.

The price of a GlassCover is € 320 per m² incl. magnet suspension.

The felt can also be used as a curtain in a more traditional way with a curtain rail in the ceiling.
