

Careful handling of magnets

**The enclosed magnets are very strong
and must be handled with caution**

Before the magnets are separated from each other, please note how they must point towards each other by mounting.

(The magnets can e.g. be marked with a pen on the two sides that must point towards each other by mounting)

If the magnets are adjoined without the provided plastic ring or a similar thick material it can be difficult to separate them again.

Keep a distance between the magnets of min. 30 cm after separating them.

Mounting of the magnets on the window must be performed by two persons.

Person 1 holds magnet 1 on the selected spot on the window, while person 2 puts magnet 2 on the window app. 30 cm away from magnet 1.

Subsequently, magnet 2 is carefully glided towards magnet 1 until they adjoin.
